

# The 1988 Index to MP

A Guide to Volume 27, 1988

## Subject Index

### ABRASION

Aluminum's Resistance to Coal in Rail Cars, 11-37  
Electronic Equipment Connector Corrosion, 3-35  
Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Polyarylene Sulfide Coatings on Pony Rod, 3-16  
RP0775-87—Corrosion Coupons in Oil Production, 4-57

### ABRASIVE SURFACE PREPARATION

Designing Coating Systems for Concrete, 9-34  
Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Wet Abrasive Blasting Techniques, 10-31

### ABSORPTION

Water Absorption by Coatings, 1-75  
Inhibition of Nuclear Waste Solutions, 5-34

### ACID SURFACE PREPARATION

Designing Coating Systems for Concrete, 9-34

### ACIDS

Fluorocarbon Heat Exchangers vs Corrosives, 9-55  
GRP Linings Compared to Rubber Linings, 12-19  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Tank Trunk Lined vs Acidic Pesticide Solution, 11-53  
Washed Sludge Attack on Radioactive Tank, 5-16

### ACRYLICS

Coatings Selection and Cost Guide—1988, 6-29  
Designing Coating Systems for Concrete, 9-34

### ADHESION

Cathodic Disbonding of Tape Pipe Coatings, 11-19  
Designing Coating Systems For Concrete, 9-34  
Moisture Transfer Through Coatings, 2-80  
Phosphate Stability on Auto Body Steels, 11-56  
Wet Abrasive Blasting Techniques, 10-31

### ADHESION, MATERIALS EFFECTS

Pipe Coating's Influence on Cathodic Protection, 12-13

### ADHESIVE EFFECTS

Joint Failure in Elevated Concrete Tanks, 12-27

### ADMINISTRATIVE PUBLICATIONS

NACE Anthruster Policy, 11-11

### AERATION

Stainless Liquid Cargo Tank Truck Corrosion, 11-69

### AEROBIC MICROORGANISMS

Control of Internal Attack by Bacteria, 4-49

### AIR

Desiccated Air Drying of Gas Pipelines, 9-48

### ALCOHOLS

Fluorocarbon Heat Exchangers vs Corrosives, 9-55

### ALDEHYDES

Waterflood Biological Control by Glutaraldehyde, 8-40  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

### ALKALIS AND SALTS

Fluorocarbon Heat Exchangers vs Corrosives, 9-55  
Coatings Selection and Cost Guide—1988, 6-29

### ALKALIZATION

Industrial Boiler Water-Related Failures, 6-51  
Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

### ALKYD COATINGS

Cathodic Disbonding of Tape Pipe Coatings, 11-19  
Coatings Selection and Cost Guide—1988, 6-29

### ALLOYING

Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70  
Alloy Performance in Sulfuric Acid, 3-40  
Crevice Resistance of Stainless Steel in Marine Environments, 7-67

Disc: Magnesium Anode Performance, 4-54

Evaluation of Stainless Atmospheric Attack, 2-47

Guide to Use of 6 Mo Austenitic Stainless, 12-39

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Improved High Nickel Alloy Cast Material, 12-45

Kraft Recovery Boiler Fireside Attack, 7-40

Liquefied Petroleum Gas Storage Vessel Cracking, 10-79

### ALUMINUM

Aluminum's Resistance to Coal in Rail Cars, 11-37

Control of Fire Damage to Equipment—Part 2, 12-59

Hard Inclusions Influence on Hydrogen Damage, 2-21

Nickel-Containing Stainless Steel in Waters + Or -

NaCl, 7-47

RP0188-88—Holiday Tests on Protective Coatings

### ALUMINUM ANODES

Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70

Cathodic Protection Current for Cr, Crni Steels, 10-24

Ship Ballast Tank Coatings, Cathodic Protection Tests, 7-24

### AMIDE INHIBITORS

Inhibition of Wet and Raw Gas Pipeline, 12-29

### AMINES:

Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

### AMMONIA

Chlorinated Seawater vs Materials, 7-36

Coatings Selection and Cost Guide—1988, 6-29

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

### AMMONIUM SALTS

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

### ANAEROBIC MICROORGANISMS

Control of Internal Attack by Bacteria, 4-49

### ANNEALING, HEAT TREATMENT

Improved High Nickel Alloy Cast Material, 12-45

### ANODES, CATHODIC PROTECTION

Backfill for Cathodic Protection Anodes, 11-35

Disc: Magnesium Anode Performance, 4-54

Electrically Conductive Portland Concrete, 3-19

External Tank Bottom Cathodic Protection, 4-32

High Initial Current Density in Cathodic Protection, 2-9

Personal Computer Use in Corrosion Control, 6-21

### ANODES, GALVANIC

High Initial Current Density in Cathodic Protection, 2-9

Power Line Pole and Tower Foundation Cathodic Protection, 8-20

### ANODES, IMPRESSED CURRENT CATHODIC PROTECTION

Ceramic-Coated Anodes for Cathodic Protection, 10-19

External Tank Bottom Cathodic Protection, 4-32

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

### ANODIC ELECTRODE PHENOMENA

Lateral Potential Test Methods for Pipelines, 5-49

Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

### ANODIC PROTECTION

Alloy Performance in Sulfuric Acid, 3-40

### AQUEOUS ENVIRONMENTS

Coatings Selection and Cost Guide—1988, 6-29

Designing Coating Systems for Concrete, 9-34

Fluorocarbon Heat Exchangers vs Corrosives, 9-55

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

TM0187-87—Elastomers in Sour Gas Environment, 1-57

### ARCTIC SEAWATER ENVIRONMENTS

Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Norwegian Deep Water Cathodic Protection Tests, 1-49

### ARTIFACTS

Archaeological Artifact Conservation, 11-34

### ARTIFICIAL INTELLIGENCE

Applications in Petroleum Industry 6-77

### ATMOSPHERIC CORROSION

Air Pollutants vs Galvanized Steel, 3-47

Atmospheric Corrosion Test Review, 10-56, 11-64, 12-35

Coatings for Sewage Treatment Plants, 5-85

Corrosion Products Pressure Tests, 9-74

Evaluation of Stainless Atmospheric Attack, 2-47

Pipe Coating's Influence on Cathodic Protection, 12-13

Polyester Tape for Atmosphere and Underground, 8-30

### ATOMIC EFFECTS

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Inspection, Repair of Immersed Linings, 6-44

### AUTOCALVE TESTING

Age-Hardenable, High-Strength, High-Base Alloys, 9-59

Oilfield Elastomers, Seals vs DMDS, 8-46

TM0187-87—Elastomers in Sour Gas Environment, 1-57

### AUTOMOBILES

Phosphate Stability on Auto Body Steels, 11-56

### BACKFILL

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

### BATCH INJECTION, WELL INHIBITORS

Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17

### BENZENE

GRP Linings Compared to Rubber Linings, 12-19

### BIOLOGICAL EFFECTS

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Chlorinated Seawater vs Materials, 7-36

Coatings for Sewage Treatment Plants, 5-85

Control of Internal Attack by Bacteria, 4-49

Microbiological Attack Failure Analysis, 3-50

Sulfate-Reducing Bacteria Presence Test, 8-71

Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57

Waterflood Biological Control by Glutaraldehyde, 8-40

### BLISTERING OF MATERIALS

Hard Inclusions Influence on Hydrogen Damage, 2-21

Industrial Boiler Water-Related Failures, 6-51

Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

### BLISTERING, COATINGS

Inspection, Repair of Immersed Linings, 6-44

Moisture Transfer Through Coatings, 2-80

Osmosis, Electroosmosis vs Coatings, 3-63

Phosphate Stability on Auto Body Steels, 11-56

Ship Ballast Tank Coatings, Cathodic Protection Tests, 7-24

### BOATS

Nickel-Containing Stainless Steel in Waters + Or - NaCl, 7-47

### BOILERS

Deaerator Cracking Failure Analysis Review, 10-73

Deaerator Cracking Overview—Part 1, 9-70

Effective Corrosion Monitoring Surveys, 4-41

Fireside Attack in Refuse-Fired Boilers, 5-22

Industrial Boiler Water-Related Failures, 6-51

Kraft Recovery Boiler Fireside Attack, 7-40

### BOLTS

Control of Fire Damage to Equipment—Part 2, 12-59

Substandard Bolts Cause Widespread Problems, 11-85

# BONDING

Electrically Conductive Portland Concrete, 3-19

# BRIDGES

Electrically Conductive Portland Concrete, 3-19

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

# BUTANE

Liquefied Petroleum Gas Storage Vessel Cracking, 10-79

# BUTYL RUBBER COATINGS

Aluminum's Resistance to Coal in Rail Cars, 11-37

Hope Cracking in HF by Residual Stresses, 12-49

# CABLE, NONELECTRICAL

Nickel-Containing Stainless Steel in Waters + Or - NaCl, 7-47

# CADMIUM

Cadmium Electrodeposition from Phosphate Elements, 5-39

# CALCAREOUS DEPOSITS

Cathodic Protection Current for Cr, Crni Steels, 10-24

H Charging of Steel vs Cathodic Protection, 7-63

High Initial Current Density in Cathodic Protection, 2-9

Norwegian Deep Water Cathodic Protection Tests, 1-49

Offshore Cathodic Protection Modeling by Computer, 9-25

Ship Ballast Tank Coating, Cathodic Tests, 7-24

# CALCIUM

Hard Inclusions Influence on Hydrogen Damage, 2-21

# CALCIUM CARBONATE

Computer Assists in Water Problem Control, 9-46

Flue Gas Attack Analysis by Computer System, 10-49

Norwegian Deep Water Cathodic Protection Tests, 1-49

# CALCULATIONS

Atmospheric Corrosion Tests Review, 12-35

Pipe Coating's Influence on Cathodic Protection, 12-13

# CAPACITORS

Nickel-Containing Stainless Steel in Waters + Or - NaCl, 7-47

# CARBIDES

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Industrial Boiler Water-Related Failures, 6-51

# CARBON

Electrically Conductive Portland Concrete, 3-19

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

# CARBON ANODES, CATHODIC PROTECTION

Cathodic Protection Power Plant Steel Grounding Systems, 7-11

Ceramic-Coated Anodes for Cathodic Protection, 10-19

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

# CARBON DIOXIDE

Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9

Fiberglass Oilfield Pipe vs Carbon Dioxide, 8-51

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Inhibition of Nuclear Waste Solutions, 5-34

Inhibition of Wet and Raw Gas Pipeline, 12-29

Monoethanolamine SCC Env Contents Influence, 12-53

Oilfield Elastomers, Seals vs DMDS, 8-46

Polyarylene Sulfide Coatings on Pony Rod, 3-16

Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

TMO187-87—Elastomers in Sour Gas Environment, 1-57

Washed Sludge Attack on Radioactive Tank, 5-16

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

# CARBON MONOXIDE

Fireside Attack in Refuse-Fired Boilers, 5-22

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

# CARBON STEEL

Aluminum's Resistance to Coal in Rail Cars, 11-37

Cathodic Protection Current for Cr, Crni Steels, 10-24

Cathodic Protection Power Plant Steel Grounding Systems, 7-11

Coatings for Sewage Treatment Plants, 5-85

Corrosion Products Pressure Tests, 9-74

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Degreaser Cracking Failure Analysis Review, 10-73

Fireside Attack in Refuse-Fired Boilers, 5-22

Flue Gas Desulfurizer Inhibitors, 2-12

Hard Inclusions Influence on Hydrogen Damage, 2-21

Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Industrial Boiler Water-Related Failures, 6-51

Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17

Inhibition of Nuclear Waste Solutions, 5-34

Integrity Assurance for Underground Tank, 4-27

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Liquefied Petroleum Gas Storage Vessel Cracking, 10-79

Naphthenic Acid vs Crude Distillation Unit, 1-37

Phosphate Stability on Auto Body Steels, 11-56

Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Power Line Pole and Tower Foundation Cathodic Protection, 8-20

Pressure Vessel Stress Cracking Test, 2-38

Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

Sour Gas Gathering System Failure Analysis, 4-10

Specimen Orientation Influence on H<sub>2</sub> Cracking, 3-31

Steel-CuNi Galvanic Effects on Piling, 5-45

Tank Trunk Lined vs Acidic Pesticide Solution, 11-53

Velocity, Temperature Effects on Steel Cleaning, 2-26

Washed Sludge Attack on Radioactive Tank, 5-16

Wet Abrasive Blasting Techniques, 10-31

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

# CARBON STEEL WROUGHT

Control of Fire Damage to Equipment, 12-59

GRP Linings Compared to Rubber Linings, 12-19

Monoethanolamine SCC Env Contents Influence, 12-53

# CARBONATES

Inhibition of Nuclear Waste Solutions, 5-34

Monoethanolamine SCC Env Contents Influence, 12-53

Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

Underdeposit Corrosion Due to Inhibitor, 2-31

# CARBONIC ACIDS

Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9

# CASING, WELL

Cathodic Protection of Offshore Well Casings, 3-26

# CAST IRON

Cast and Ductile Iron Pipe Dealloying, 5-58

Ceramic-Coated Anodes for Cathodic Protection, 10-19

# CASTING EFFECTS

Improved High Nickel Alloy Cast Material, 12-45

# CATALYSIS

Electronic Equipment Connector Corrosion, 3-35

# CATALYTIC CRACKERS, PETROLEUM

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

# CATALYTIC EFFECTS

Atmospheric Corrosion Test Review, 11-64, 12-35

# CATHODIC PROTECTION

Archaeological Artifact Conservation, 11-34

Backfill for Cathodic Protection Anodes, 11-35

Cathodic Protection Current for Cr, Crni Steels, 10-24

Cathodic Protection of Offshore Well Casings, 3-26

Cathodic Protection Power Plant Steel Grounding Systems, 7-11

Cathodic Disbonding of Tape Pipe Coatings, 11-19

Cathodic Protection Design Expert System, 6-17

Ceramic-Coated Anodes for Cathodic Protection, 10-19

Design of Systems and Devices—Speller Award, 5-9

Disc: Magnesium Anode Performance, 4-54

Erratum—Compensating for IR Drop on Pipe, 3-54

External Tank Bottom Cathodic Protection 4-32

Hydrogen Charging of Steel vs Cathodic Protection, 7-63

Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Lateral Potential Test Methods for Pipelines, 5-49

NACE Standards, Certification in Tank Regulations, 11-30

Nickel-Containing Stainless Steel in Waters + Or - NaCl, 7-47

Norwegian Deep Water Cathodic Protection Tests, 1-49

Offshore Cathodic Protection Modeling by Computer, 9-25

Personal Computer Use in Corrosion Control, 6-21

Pipe Coating's Influence on Cathodic Protection, 12-13

Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Power Line Pole and Tower Foundation Cathodic Protection, 8-20

Ship Ballast Tank Coatings, Cathodic Protection Tests, 7-24

Steel-CuNi Galvanic Effects on Piling, 5-45

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

Underground Pipeline Corrosion Control, 4-9

Underground Tank Protection and Regulations, 4-36

Variations in Cathodic Protection Criteria, 8-17

# CERAMIC COATINGS

Ceramic-Coated Anodes for Cathodic Protection, 10-19

# CESIUM, CAUSES

Washed Sludge Attack on Radioactive Tank, 5-16

# CHELATION

Industrial Boiler Water-Related Failures, 6-51

# CHEMICAL OR ELECTROCHEMICAL TESTING

Chlorinated Seawater vs Materials, 7-36

Design of Systems and Devices—Speller Award, 5-9

Inhibition of Nuclear Waste Solutions, 5-34

Pressure Vessel Stress Cracking Test, 2-38

Sulfate-Reducing Bacteria Presence Test, 8-71

# CHEMICAL SURFACE PREPARATION

Fluorocarbon Heat Exchangers vs Corrosives, 9-55

# CHEMICALS

Chemical Transport Truck Corrosion Control, 11-72

Designing Coating Systems for Concrete, 9-34

Tank Trunk Lined vs Acidic Pesticide Solution, 11-53

# CHLORIDES

Age-Hardenable, High-Strength, High-Base Alloys, 9-59

Air Pollutants vs Galvanized Steel, 3-47

Artificial Intelligence Applications in Petroleum Industry 6-77

Atmospheric Corrosion Tests Review, 12-35

Attack by Hot Gases from Lead Recovery, 5-28

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Electronic Equipment Connector Corrosion, 3-35

Fireside Attack in Refuse-Fired Boilers, 5-22

Flue Gas Desulfurizer Inhibitors, 2-12

Guide to Use of 6 Mo Austenitic Stainless, 12-39

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Inhibition of Nuclear Waste Solutions, 5-34

Integrity Assurance for Underground Tank, 4-27

Monoethanolamine SCC Env Contents Influence, 12-53

Stainless Liquid Cargo Tank Truck Corrosion, 11-69

Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

Underdeposit Corrosion Due to Inhibitor, 2-31

# CHLORINE

Attack by Hot Gases from Lead Recovery, 5-28

Chlorinated Seawater vs Materials, 7-36

Coatings Selection and Cost Guide—1988, 6-29

GRP Linings Compared to Rubber Linings, 12-19

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Nickel-Containing Stainless Steel in Waters + Or -  
NaCl, 7-47

Waterflood Biological Control by Glutaraldehyde, 8-40

**CHLORINE DIOXIDE**

Improved High Nickel Alloy Cast Material, 12-45

**CHROMATE CONVERSION COATINGS**

Aluminum's Resistance to Coal in Rail Cars, 11-37

**CHROMIUM**

Evaluation of Stainless Atmospheric Attack, 2-47

**CHROMIUM MOLYBDENUM ALLOYS**

Alloy Performance in Sulfuric Acid, 3-40

**CLEANING**

Chemical Transport Truck Corrosion Control, 11-72

Corrosion Basics—Equipment Cleaning, 12-63

Inspection, Repair of Immersed Linings, 6-44

Pressure Vessel Stress Cracking Test, 2-38

RP0487-87—Interim Petroleum-Based Coating, 2-55

RP0775-87—Corrosion Coupons in Oil Production, 4-57

Stainless Liquid Cargo Tank Truck Corrosion, 11-69

Velocity, Temperature Effects on Steel Cleaning, 2-26

Zirconium Pyrophoric Incident Avoidance, 10-70

**COAL TAR COATINGS**

Cathodic Disbonding of Tape Pipe Coatings, 11-19

Coatings for Sewage Treatment Plants, 5-85

Coatings Selection and Cost Guide—1988, 6-29

Designing Coating Systems for Concrete, 9-34

Impressed Current Cathodic Protection on Arctic Caisson, 11-25

**COAL**

Aluminum's Resistance to Coal in Rail Cars, 11-37

Fluoroelastomer Expansion Joints vs H<sub>2</sub>SO<sub>4</sub>, 3-12

Industrial Boiler Water-Related Failures, 5-51

**COATINGS**

Aluminum's Resistance to Coal in Rail Cars, 11-37

Cathodic Disbonding of Tape Pipe Coatings, 11-19

Coatings for Portable Water Tanks, 9-37

Coatings for Underground Systems, 4-96

Designing Coating Systems for Concrete, 9-34

Integrity Assurance for Underground Tanks, 4-27

Moisture Transfer Through Coatings, 2-80

Osmosis, Electroosmosis vs Coatings, 3-63

Pipe Coating's Influence on Cathodic Protection, 12-13

RP0386-86—Railroad Hopper Car Internal Coatings, 11-40

RP0188-88—Holiday Tests on Protective Coatings, 10-38

RP0487-87—Interim Petroleum-Based Coating, 2-55

Ship Ballast Tank Coatings, Cathodic Protection, 7-24

Specifications for Coatings Contracts, 10-45

Techniques to Extend Lives of Nonmetal, 12-23

Underground Tank Protection and Regulations, 4-36

Water Absorption by Coatings, 1-75

Water Tank Internal Recoating Case History, 10-47

**COATINGS TESTING**

RP0386-86—Railroad Hopper Car Internal Coatings, 11-40

RP0188-88—Holiday Tests on Protective Coatings, 10-38

RP0487-87—Interim Petroleum-Based Coating, 2-55

**COATINGS, METAL**

Phosphate Stability on Auto Body Steels, 11-56

**COATINGS, MULTIPHASE**

Coatings for Underground Systems, 4-96

Designing Coating Systems for Concrete, 9-34

**COBALT ALLOYS**

Attack by Hot Gases from Lead Recovery, 5-28

Flue Gas Desulfurizer Inhibitors, 2-12

**COKE, PETROLEUM**

Artificial Intelligence Applications in Petroleum Industry, 6-77

**COLD FABRICATION**

Age-Hardenable, High-Strength, High-Base Alloys, 9-59

**COLORIMETRIC TESTING**

Evaluation of Stainless Atmospheric Attack, 2-47

**COMBUSTION GASES, CAUSES**

Attack by Hot Gases from Lead Recovery, 5-28

Fireside Attack in Refuse-Fired Boilers, 5-22

Flue Gas Attack Analysis by Computer System, 10-49

Flue Gas Desulfurizer Inhibitors, 2-12

Fluoroelastomer Expansion Joints vs H<sub>2</sub>SO<sub>4</sub>, 3-12

Kraft Recovery Boiler Fireside Attack, 7-40

**COMBUSTION**

Control of Fire Damage to Equipment, 11-79, 12-59

Underground Tank Protection and Regulations, 4-36

Zirconium Pyrophoric Incident Avoidance, 10-70

**COMPRESSIVE PRESSURE EFFECTS**

TMO187-87—Elastomers in Sour Gas Environment, 1-57

**COMPUTER CALCULATIONS**

Artificial Intelligence Applications in Petroleum Industry, 6-77

Cathodic Protection Design Expert System, 6-17

Computer Assists in Water Problem Control, 9-46

Effective Corrosion Monitoring Surveys, 4-41

Flue Gas Attack Analysis by Computer System, 10-49

Inhibition of Wet and Raw Gas Pipeline, 12-29

Integrity Assurance for Underground Tanks, 4-27

Lateral Potential Test Methods for Pipelines, 5-49

Offshore Cathodic Protection Modeling by Computer, 9-25

Personal Computer Information, 7-79, 8-84, 6-84, 6-21

Underground Pipeline Corrosion Control, 4-9

**CONCENTRATION CELLS**

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Cathodic Protection Power Plant Steel Grounding Systems, 7-11

Control of Internal Attack by Bacteria, 4-49

Deaerator Cracking Failure Analysis Review, 10-73

Evaluation of Stainless Atmospheric Attack, 2-47

Integrity Assurance for Underground Tanks, 4-27

Stainless Liquid Cargo Tank Truck Corrosion, 11-69

**CONCENTRATION OF CHEMICALS**

Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70

Alloy Performance in Sulfuric Acid, 3-40

Chlorinated Seawater vs Materials, 7-36

GRP Linings Compared to Rubber Linings, 12-19

Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17

Inhibition of Wet and Raw Gas Pipeline, 12-29

Liquefied Petroleum Gas Storage Vessel Cracking, 10-79

Monoethanolamine SCC Env Contents Influence, 12-53

Naphthenic Acid vs Crude Distillation Unit, 1-37

Monel Failure in Hydrogen Fluoride Due to Hot H<sub>2</sub>SO<sub>4</sub>, 10-72

Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

**CONCRETE**

Coatings for Sewage Treatment Plants, 5-85

Control of Fire Damage to Equipment, 12-59

Designing Coating Systems for Concrete, 9-34

Electrically Conductive Portland Concrete, 3-19

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Joint Failure in Elevated Concrete Tanks, 12-27

Power Line Pole and Tower Foundation Cathodic Protection, 8-20

RP0188-88—Holiday Tests on Protective Coatings, 10-38

Sulfate-Reducing Bacteria Presence Test, 8-71

Techniques to Extend Lives of Nonmetals, 12-23

**CONCRETE COATINGS**

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

**CONDENSATION**

Air Pollutants vs Galvanized Steel, 3-47

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Corrosion Products Pressure Tests, 9-74

Deaerator Cracking Overview—Part 1, 9-70

Evaluation of Stainless Atmospheric Attack, 2-47

Fireside Attack in Refuse-Fired Boilers, 5-22

Flue Gas Attack Analysis by Computer System, 10-49

Fluoroelastomer Expansion Joints vs H<sub>2</sub>SO<sub>4</sub>, 3-12

Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17

Inhibition of Wet and Raw Gas Pipelines, 12-29

Kraft Recovery Boiler Fireside Attack, 7-40

**CONDUCTIVE CONCRETE**

Electrically Conductive Portland Concrete, 3-19

RP0188-88—Holiday Tests on Protective Coatings, 10-38

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

**CONDUCTIVITY**

Fluorocarbon Heat Exchangers vs Corrosives, 9-55

Integrity Assurance for Underground Tanks, 4-27

RP0188-88—Holiday Tests on Protective Coatings, 10-38

**CONTAMINATION**

Air Pollutants vs Galvanized Steel, 3-47

Alloy Performance in Sulfuric Acid, 3-40

Electronic Equipment Connector Corrosion, 3-35

Integrity Assurance for Underground Tanks, 4-27

Underground Tank Protection and Regulations, 4-36

**CONTINUOUS INJECTION, INHIBITORS**

Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17

**CONVERSION COATINGS**

Coatings Selection and Cost Guide—1988, 6-29

**COOLING AQUEOUS**

Effective Corrosion Monitoring Surveys, 4-41

Expert Systems for Open Cooling Water Corrosion, 6-57

Sulfate-Reducing Bacteria Presence Test, 8-71

Underdeposit Corrosion Due to Inhibitor, 2-31

**COOLING SYSTEMS**

Chlorinated Seawater vs Materials, 7-36

Fluorocarbon Heat Exchangers vs Corrosives, 9-55

Sulfate-Reducing Bacteria Presence Test, 8-71

**COPPER**

Alloy Performance in Sulfuric Acid, 3-40

Archaeological Artifact Conservation, 11-34

Cathodic Protection Power Plant Steel Grounding Systems, 7-11

Chlorinated Seawater vs Materials, 7-36

Control of Fire Damage to Equipment, 12-59

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Power Line Pole and Tower Foundation Cathodic Protection, 8-20

Seawater Pump Alloys Recent Developments, 7-51

Sulfobacteria vs Cuvined Pipe in Seawater, 8-57

**CORROSION PRODUCTS**

Attack by Hot Gases from Lead Recovery, 5-28

Corrosion Products Pressure Tests, 9-74

Phosphate Stability on Auto Body Steels, 11-56

Pipe Coating's Influence on Cathodic Protection, 12-13

Sulfate-Reducing Bacteria Presence Test, 8-71

Underdeposit Corrosion Due to Inhibitor, 2-31

Zirconium Pyrophoric Incident Avoidance, 10-70

**COUPONS, FIELD TEST**

Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

# INCINERATION

Fireside Attack in Refuse-Fired Boilers, 5-22

# INCLUSIONS

Deaerator Cracking Failure Analysis Review, 10-73

Hard Inclusions Influence on Hydrogen Damage, 2-21

Specimen Orientation Influence on H<sub>2</sub> Cracking, 3-31

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

# INERT GAS SHIELD WELDING

Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57

# INERT GASES

Stainless Liquid Cargo Tank Truck Corrosion, 11-69

# INHIBITORS

Corrosion Products Pressure Tests, 9-74

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Deaerator Cracking Failure Analysis Review, 10-73

Expert Systems for Open Cooling Water Corrosion, 6-57

Fireside Attack in Refuse-Fired Boilers, 5-22

Flue Gas Desulfurizer Inhibitors, 2-12

Industrial Boiler Water-Related Failures, 6-51

Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17

Inhibition of Nuclear Waste Solutions, 5-34

Inhibition of Wet and Raw Gas Pipelines, 12-29

Polyester Tape for Atmosphere and Underground, 8-30

RP0775-87—Corrosion Coupons in Oil Production, 4-57

RP0487-87—Interim Petroleum-Based Coating, 2-55

Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

Sour Gas Gathering System Failure Analysis, 4-10

Washed Sludge Attack on Radioactive Tank, 5-16

Wet Abrasive Blasting Techniques, 10-31

# INORGANIC-ORGANIC MULTIPHASE MATERIALS

Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9

Fiberglass Oilfield Pipe vs Carbon Dioxide, 8-51

GRP Linings Compared to Rubber Linings, 12-19

Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Polyester Tape for Atmosphere and Underground, 8-30

Tank Bottom Internal Repairs with FRP Linings, 8-32

Tank Trunk Lined vs Acidic Pesticide Solution, 11-53

25-Year Oilfield Service of Epoxy FRP Pipe, 8-81

# INSPECTION

Chemical Transport Truck Corrosion Control, 11-72

Coatings for Portable Water Tanks, 9-37

Coatings Selection and Cost Guide—1986, 6-29

Control of Fire Damage to Equipment—Part 1, 11-79

Deaerator Cracking Failure Analysis Review, 10-73

Inhibition of Wet and Raw Gas Pipelines, 12-29

Inspection, Repair of Immersed Linings, 6-44

Integrity Assurance for Underground Tanks, 4-27

Personal Computer Use in Corrosion Control, 6-21

RP0386-86—Railroad Hopper Car Internal Coatings, 11-40

Stainless Liquid Cargo Tank Truck Corrosion, 11-69

Techniques to Extend Lives of Nonmetals, 12-23

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

# INSTANTANEOUS RATE TESTS

Corrosion Products Pressure Tests, 9-74

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Effective Corrosion Monitoring Surveys, 4-41

Flue Gas Desulfurizer Inhibitors, 2-12

Inhibition of Wet and Raw Gas Pipelines, 12-29

# INSTRUMENTATION, TESTING

Air Pollutants vs Galvanized Steel, 3-47

Atmospheric Corrosion Tests Review, 12-35

Attack by Hot Gases from Lead Recovery, 5-28

Corrosion Products Pressure Tests, 9-74

Design of Systems and Devices—Speller Award, 5-9

Electrically Conductive Portland Concrete, 3-19

Hydrogen Charging of Steel vs Cathodic Protection, 7-63

Inhibition of Wet and Raw Gas Pipelines, 12-29

Norwegian Deep Water Cathodic Protection Tests, 1-49

Oilfield Elastomers, Seals vs DMDS, 8-46

Polyethylene Sulfide Coatings on Pony Rod, 3-16

Reinforced Concrete Potentials Variation, 4-45

RP0775-87—Corrosion Coupons in Oil Production, 4-57

RP0188-86—Holiday Tests on Protective Coatings

Sour Gas Gathering System Failure Analysis, 4-10

Sulfate-Reducing Bacteria Presence Test, 8-71

TMO187-87—Elastomers in Sour Gas Environment, 1-57

Velocity, Temperature Effects on Steel Cleaning, 2-26

Waterflood Biological Control by Glutaraldehyde, 8-40

# INSULATORS, ELECTRICAL

Corrosion Products Pressure Tests, 9-74

Techniques to Extend Lives of Nonmetals, 12-23

# INTERFACE EFFECTS

Electronic Equipment Connector Corrosion, 3-35

Inhibition of Nuclear Waste Solutions, 5-34

Kraft Recovery Boiler Fireside Attack, 7-40

Pipe Coating's Influence on Cathodic Protection, 12-13

Underdeposit Corrosion Due to Inhibitor, 2-31

Washed Sludge Attack on Radioactive Tank, 5-16

Cracking, 4-22

# INTERGRANULAR, LOCALIZED EFFECTS

Age-Hardenable, High-Strength, High-Base Alloys, 9-59

Attack by Hot Gases from Lead Recovery, 5-28

Improved High Nickel Alloy Cast Material, 12-45

Monoethanolamine SCC Env Contents Influence, 12-53

Pipe Surface Condition Influence on Stress Corrosion

Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

## INTERNAL ATTACK

Integrity Assurance for Underground Tanks, 4-27  
Underground Tank Protection and Regulations, 4-36

## JOINING, CAUSES

Joint Failure in Elevated Concrete Tanks, 12-27

## KEROSENE

Control of Fire Damage to Equipment, 12-59

## KRAFT PROCESS, PAPER INDUSTRY

Kraft Recovery Boiler Fireside Attack, 7-40  
Pressure Vessel Stress Cracking Test, 2-38

## LABORATORY TESTING

Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70

Aluminum's Resistance to Coal in Rail Cars, 11-37  
Attack by Hot Gases from Lead Recovery, 5-28  
Cathodic Protection Current for Cr, CrNi Steels, 10-24  
Cathodic Disbonding of Tape Pipe Coatings, 11-19  
Chlorinated Seawater vs Materials, 7-36  
Control of Internal Attack by Bacteria, 4-49  
Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Duplex Stainless Alloy in Marine Environments, 10-63  
Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9  
Fiberglass Oilfield Pipe vs Carbon Dioxide, 8-51  
Fireside Attack in Refuse-Fired Boilers, 5-22  
Fluoroelastomer Expansion Joints vs H<sub>2</sub>SO<sub>4</sub>, 3-12  
Hope Cracking in HF by Residual Stresses, 12-49  
Hydrogen Charging of Steel vs Cathodic Protection, 7-63

Improved High Nickel Alloy Cast Material, 12-45  
Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17  
Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Monoethanolamine SCC Env Contents Influence, 12-53  
Personal Computer Use in Corrosion Control, 6-21  
Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Polyarylene Sulfide Coatings on Pony Rod, 3-16  
Specimen Orientation Influence on H<sub>2</sub> Cracking, 3-31  
Sulfate-Reducing Bacteria Presence Test, 8-71  
Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57  
Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

TMO187-87—Elastomers in Sour Gas Environment, 1-57  
Underdeposit Corrosion Due to Inhibitor, 2-31  
Velocity, Temperature Effects on Steel Cleaning, 2-26  
Waterflood Biological Control by Glutaraldehyde, 8-40

## LAMINATES

Fluoroelastomer Expansion Joints vs H<sub>2</sub>SO<sub>4</sub>, 3-12  
Tank Bottom Internal Repairs with FRP Linings, 8-32

## LASER WELDING, CAUSES

Reinforced Polymer Joining by Laser Ablation, 12-52

## LAWS, REGULATIONS

Recyclable Steel Grit for Surface Preparation, 10-35  
Underground Tank Protection and Regulations, 4-36

## LEAK DETECTION

Cathodic Protection of Offshore Well Casings, 3-26  
Compliance Goals of Underground Tank Regulations, 11-31

Hope Cracking in HF by Residual Stresses, 12-49  
Integrity Assurance for Underground Tanks, 4-27  
Joint Failure in Elevated Concrete Tanks, 12-27  
NACE Standards, Certification in Tank Regulations, 11-30

Techniques to Extend Lives of Nonmetals, 12-23  
Underground Tank Protection and Regulations, 4-36

## LININGS, CERAMIC

Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

## LININGS, COATINGS

Liquefied Petroleum Gas Storage Vessel Cracking, 10-79  
RP0386-86—Railroad Hopper Car Internal Coatings, 11-40

Tank Bottom Internal Repairs with FRP Linings, 8-32  
Tank Trunk Lined vs Acidic Pesticide Solution, 11-53  
Techniques to Extend Lives of Nonmetals, 12-23  
Underground Tank Protection and Regulations, 4-36  
Vinyl Coating Failure from Inadequate Ventilation, 11-51  
Water: Tank Internal Recoating Case History, 10-47

## LINING, THICK FILM

Coatings for Sewage Treatment Plants, 5-85  
Coatings Selection and Cost Guide—1986, 6-29  
GRP Linings Compared to Rubber Linings, 12-19  
Hope Cracking in HF by Residual Stresses, 12-49  
Inspection, Repair of Immersed Linings, 6-44  
Stainless Liquid Cargo Tank Truck Corrosion, 11-69  
Tank Bottom Internal Repairs with FRP Linings, 8-32  
Tank Trunk Lined vs Acidic Pesticide Solution, 11-53  
Techniques to Extend Lives of Nonmetals, 12-23

## LIQUID PETROLEUM

Artificial Intelligence Applications in Petroleum Industry, 6-77

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Liquefied Petroleum Gas Storage Vessel Cracking, 10-79  
Naphthenic Acid vs Crude Distillation Unit, 1-37  
Tank Bottom Internal Repairs with FRP Linings, 8-32  
25-Year Oilfield Service of Epoxy FRP Pipe, 8-81

## LIQUIFIED PETROLEUM GASES

Storage Vessel Cracking, 10-79

## LITHIUM HYDROXIDE

Attack by Hot Gases from Lead Recovery, 5-28

## LUBRICANTS

Electronic Equipment Connector Corrosion, 3-35

## MAGNESIUM

Disc: Magnesium Anode Performance, 4-54

## MAGNETIC PARTICLE TESTS

Chemical Transport Truck Corrosion Control, 11-72  
Deaerator Cracking Failure Analysis Review, 10-73  
Deaerator Cracking Overview—Part 1, 9-70  
Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

## MAGNETITE

Monoethanolamine SCC Env Contents Influence, 12-53  
Underdeposit Corrosion Due to Inhibitor, 2-31

## MAGNITUDES, SPECIMEN SIZES FOR TESTING

Specimen Orientation Influence on H<sub>2</sub> Cracking, 3-31

## MANGANESE

Crevice Resistance of Stainless Steel in Marine Environments, 7-57

Hard Inclusions Influence on Hydrogen Damage, 2-21  
Specimen Orientation Influence on H<sub>2</sub> Cracking, 3-31

## MARINE ATMOSPHERIC ON-SITE TESTING

Coatings Selection and Cost Guide—1986, 6-29  
Corrosion Products Pressure Tests, 9-74  
Evaluation of Stainless Atmospheric Attack, 2-47

## MASTIC COATINGS

Coatings Selection and Cost Guide—1986, 6-29  
Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Tank Bottom Internal Repairs with FRP Linings, 8-32

## MEMBRANES

Underground Tank Protection and Regulations, 4-36

## MERCURY SALTS

Fireside Attack in Refuse-Fired Boilers, 5-22

## METAL CLAD METALS

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

## METAL COATINGS

Aluminum's Resistance to Coal in Rail Cars, 11-37  
Kraft Recovery Boiler Fireside Attack, 7-40  
Phosphate Stability on Auto Body Steels, 11-56  
Substandard Bolts Cause Widespread Problems, 11-85

## METAL OXIDE ANODES

Ceramic-Coated Anodes for Cathodic Protection, 10-19  
Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

## METAL PIPES

Cast and Ductile Iron Pipe Dealloying, 5-58  
Chlorinated Seawater vs Materials, 7-36  
Coatings for Portable Water Tanks, 9-37  
Compliance Goals of Underground Tank Regulations, 11-31  
Duplex Stainless Alloy in Marine Environments, 10-63  
Erratum—Compensating for IR Drop on Pipe, 3-54  
Industrial Boiler Water-Related Failures, 6-51  
Integrity Assurance for Underground Tanks, 4-27  
Kraft Recovery Boiler Fireside Attack, 7-40

Monoethanolamine SCC Env Contents Influence, 12-53  
Naphthenic Acid vs Crude Distillation Unit, 1-37  
Nickel-Containing Stainless Steel in Waters + Or - NaCl, 7-47

Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

Specimen Orientation Influence on H<sub>2</sub> Cracking, 3-31  
Underground Tank Protection and Regulations, 4-36

## METALLOGRAPHIC TESTS

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Hard Inclusions Influence on Hydrogen Damage, 2-21  
Industrial Boiler Water-Related Failures, 6-51  
Wet H<sub>2</sub>S Cracking in Petroleum Refineries, 1-30

## METALS

Control of Fire Damage to Equipment, 12-59

## METHANE

Oilfield Elastomers, Seals vs DMDS, 8-46  
Polyarylene Sulfide Coatings on Pony Rod, 3-16  
TMO187-87—Elastomers in Sour Gas Environment, 1-57

## METHYL ALCOHOLS

Sour Gas Gathering System Failure Analysis, 4-10  
Tank Bottom Internal Repairs with FRP Linings, 8-32

## METHYLENE CHLORIDE

Inadvertent Feed Mixup Attacks Titanium Exchangers, 11-75

## MICROORGANISMS

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Control of Internal Attack by Bacteria, 4-49  
Sulfate-Reducing Bacteria Presence Test, 8-71  
Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57

## MICROSTRUCTURE

Age-Hardenable, High-Strength, High-Basis Alloys, 9-59  
Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62  
Improved High Nickel Alloy Cast Material, 12-59

## MOLTEN ENVIRONMENTS

Fireside Attack in Refuse-Fired Boilers, 5-22  
Kraft Recovery Boiler Fireside Attack, 7-40

## MOLYBDENUM

Alloy Performance in Sulfuric Acid, 3-40  
Crevice Resistance of Stainless Steel in Marine Environments, 7-57  
Evaluation of Stainless Atmospheric Attack, 2-47  
Guide to Use of 6 Mo Austenitic Stainless, 12-39  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

## NAPHTHA

Tank Bottom Internal Repairs with FRP Linings, 8-32

## NAPHTHENIC ACIDS

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44  
Naphthenic Acid vs Crude Distillation Unit, 1-37

## NATURAL GAS

Desiccated Air Drying of Gas Pipelines, 9-48  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

RP0775-87—Corrosion Coupons in Oil Production, 4-57

Sour Gas Gathering System Failure Analysis, 4-10  
Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

25-Year Oilfield Service of Epoxy FRP Pipe, 8-81

## NERNST EQUATION

Pipe Coating's Influence on Cathodic Protection, 12-13

## NICKEL COATINGS

Electronic Equipment Connector Corrosion, 3-35  
Phosphate Stability on Auto Body Steels, 11-56

## NICKEL-COPPER ALLOYS

Chlorinated Seawater vs Materials, 7-36  
Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44  
Duplex Stainless Alloy in Marine Environments, 10-63

Monel Failure in Hydrogen Fluoride Due to Hot  $H_2SO_4$ , 10-72

## NITRATES

Air Pollutants vs Galvanized Steel, 3-47  
Alloy Performance in Sulfuric Acid, 3-40  
Inhibition of Nuclear Waste Solutions, 5-34  
Washed Sludge Attack on Radioactive Tank, 5-16

## NITRIC ACIDS

Air Pollutants vs Galvanized Steel, 3-47  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

## NITRILE RUBBERS

Oilfield Elastomers, Seals vs DMS, 8-46

## NITRITE INHIBITORS

Inhibition of Nuclear Waste Solutions, 5-34  
Washed Sludge Attack on Radioactive Tank, 5-16  
Wet Abrasive Blasting Techniques, 10-31

## NITROGEN INHIBITORS

Flue Gas Desulfurizer Inhibitors, 2-12  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Sour Gas Gathering System Failure Analysis, 4-10  
Wet Abrasive Blasting Techniques, 10-31

## NITROGEN, CAUSES

Fireside Attack in Refuse-Fired Boilers, 5-22  
Guide to Use of 6 Mo Austenitic Stainless, 12-39  
Nickel-Containing Stainless Steel in Waters + Or - NaCl, 7-47  
Nondestructive Testing  
Effective Corrosion Monitoring Surveys, 4-41  
Industrial Boiler Water-Related Failures, 6-51  
Liquefied Petroleum Gas Storage Vessel Cracking, 10-79  
Stress Corrosion Cracking of Carbon Steel in Amine Systems, 1-9

## NITROUS OXIDE

Atmospheric Corrosion Tests Review, 12-35  
Nonmetal Pipes

Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9  
Fiberglass Oilfield Pipe vs Carbon Dioxide, 8-51  
Fluorocarbon Heat Exchangers vs Corrosives, 9-55  
25-Year Oilfield Service of Epoxy FRP Pipe, 8-81

## NONAQUEOUS LIQUIDS, CHEMICAL

Control of Fire Damage to Equipment, 12-59

## NONMETAL PIPES

Techniques to Extend Lives of Nonmetals, 12-23

## NONMETALS

Techniques to Extend Lives of Nonmetals, 12-23

## NUCLEAR GRADE STAINLESS STEEL

Duplex Stainless Alloy in Marine Environments, 10-63

## NUCLEAR REACTORS

Substandard Bolts Cause Widespread Problems, 11-85

## OCEAN DEPTH INFLUENCE

Norwegian Deep Water Cathodic Protection Tests, 1-49

## OFFSHORE OIL PETROLEUM—WELLS

Cathodic Protection Current for Cr, Crni Steels, 10-24  
Cathodic Protection of Offshore Well Casings, 3-26  
Hydrogen Charging of Steel vs Cathodic Protection, 7-63

High Initial Current Density in Cathodic Protection, 2-9  
Impressed Current Cathodic Protection on Arctic Caisson, 11-25

Norwegian Deep Water Cathodic Protection Tests, 1-49  
Offshore Cathodic Protection Modeling by Computer, 9-25

Steel-CuNi Galvanic Effects on Piling, 5-45

## OIL, GREASE OR WAX COATINGS

RP0487-87—Interim Petroleum-Based Coating  
Tank Bottom Internal Repairs with FRP Linings, 8-32

## OILS, PETROLEUM—PRODUCTION

RP0775-87—Corrosion Coupons in Oil Production, 4-57  
Titanium Mesh Anode for Cathodic Protection of Concrete, 9-18

## ON-SITE OR PILOT PLANT TESTING

Air Pollutants vs Galvanized Steel, 3-47  
Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70  
Control of Internal Attack by Bacteria, 4-49  
Disc: Magnesium Anode Performance, 4-54  
Duplex Stainless Alloy in Marine Environments, 10-63

Flue Gas Desulfurizer Inhibitors, 2-12

Hydrogen Charging of Steel vs Cathodic Protection, 7-63

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

High Initial Current Density in Cathodic Protection, 2-9  
Polyethylene Sulfide Coatings on Pony Rod, 3-16  
RP0775-87—Corrosion Coupons in Oil Production, 4-57  
Ship Ballast Tank Coatings, Cathodic Protection Tests, 7-24

Steel-CuNi Galvanic Effects on Piling, 5-45  
Sulfate-Reducing Bacteria Presence Test, 8-71  
Underground Tank Protection and Regulations, 4-36  
Waterflood Biological Control by Glutaraldehyde, 8-40

## OPTICAL NONDESTRUCTIVE TESTING

Chemical Transport Truck Corrosion Control, 11-72  
Integrity Assurance for Underground Tanks, 4-27  
Sour Gas Gathering System Failure Analysis, 4-10  
Wet  $H_2S$  Cracking in Petroleum Refineries, 1-30  
25-Year Oilfield Service of Epoxy FRP Pipe, 8-81

## ORGANIC COATINGS

Coatings for Underground Systems, 4-96  
Coatings Selection and Cost Guide—1988, 6-29  
Designing Coating Systems for Concrete, 9-34  
GRP Linings Compared to Rubber Linings, 12-19  
Pressure Vessel Stress Cracking Test, 2-38  
RP0487-87—Interim Petroleum-Based Coating  
Tank Bottom Internal Repairs with FRP Linings, 8-32  
Water Absorption by Coatings, 1-75

## OSMOSIS

Moisture Transfer Through Coatings, 2-80  
Osmosis, Electroosmosis vs Coatings, 3-63

## OXIDATION

Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70  
Attack by Hot Gases from Lead Recovery, 5-28  
Control of Fire Damage to Equipment—Part 1, 11-79  
Electronic Equipment Connector Corrosion, 3-35  
Fireside Attack in Refuse-Fired Boilers, 5-22  
Fluorocarbon Heat Exchangers vs Corrosives, 9-55  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67  
Inadvertent Feed Mixup Attacks Titanium Exchangers, 11-75  
Industrial Boiler Water-Related Failures, 6-51  
Kraft Recovery Boiler Fireside Attack, 7-40  
Norwegian Deep Water Cathodic Protection Tests, 1-49  
Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22  
Stress Corrosion Cracking of Mild Steel in Monoethanolamine Solution, 1-19

## OXIDES

Deaerator Cracking Overview—Part 1, 9-70

## OXYGEN

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44

Deaerator Cracking Failure Analysis Review, 10-73  
Fireside Attack in Refuse-Fired Boilers, 5-22  
Inhibition of Wet and Raw Gas Pipelines, 12-29  
Integrity Assurance for Underground Tanks, 4-27  
Pipe Coating's Influence on Cathodic Protection, 12-13  
Underdeposit Corrosion Due to Inhibitor, 2-31  
Underground Tank Protection and Regulations, 4-36  
Zirconium Pyrophoric Incident Avoidance, 10-70

## PALLADIUM

Electronic Equipment Connector Corrosion, 3-35

## PAPER

Deaerator Cracking Failure Analysis Review, 10-73  
Effective Corrosion Monitoring Surveys, 4-41  
Guide to Use of 6 Mo Austenitic Stainless, 12-39  
Kraft Recovery Boiler Fireside Attack, 7-40  
Pressure Vessel Stress Cracking Test, 2-38  
Substandard Bolts Cause Widespread Problems, 11-85  
Sulfate-Reducing Bacteria Presence Test, 8-71

## PARTICULATES

Air Pollutants vs Galvanized Steel, 3-47  
Atmospheric Corrosion Tests Review, 12-35  
Electronic Equipment Connector Corrosion, 3-35  
Inhibition of Nuclear Waste Solutions, 5-34  
Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57

Washed Sludge Attack on Radioactive Tank, 5-16  
Wet Abrasive Blasting Techniques, 10-31

## PASSIVATION

Inhibition of Nuclear Waste Solutions, 5-34  
Offshore Cathodic Protection Modeling by Computer, 9-25

Washed Sludge Attack on Radioactive Tank, 5-16

## PEENING

Deaerator Cracking Failure Analysis Review, 10-73  
Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Pressure Vessel Stress Cracking Test, 2-38

## PERFLUOROALKOXY MATERIALS

Fluorocarbon Heat Exchangers vs Corrosives, 9-55

## PERFORATION, COATINGS

Integrity Assurance for Underground Tanks, 4-27

## PERMEATION, MATERIALS

Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9  
Hydrogen Charging of Steel vs Cathodic Protection, 7-63  
Pipe Coating's Influence on Cathodic Protection, 12-13

## PERSONNEL ORGANIZATION

Communications Role in Corrosion Control, 1-88

## PETROLEUM

### PRODUCTION, PETROLEUM

Control of Internal Attack by Bacteria, 4-49  
Effective Corrosion Monitoring Surveys, 4-41  
Epoxy GRP Oilfield Pipe vs Carbon Dioxide, 3-9  
Fiberglass Oilfield Pipe vs Carbon Dioxide, 8-51  
Internal Cathodic Protection Cement-Lined Steel Pipes, 7-16

Oilfield Elastomers, Seals vs DMS, 8-46

Polyethylene Sulfide Coatings on Pony Rod, 3-16  
RP0487-87—Interim Petroleum-Based Coating  
RP0775-87—Corrosion Coupons in Oil Production, 4-57  
Sulfate-Reducing Bacteria Presence Test, 8-71  
Waterflood Biological Control by Glutaraldehyde, 8-40  
25-Year Oilfield Service of Epoxy FRP Pipe, 8-81

### PETROLEUM OR GAS WELLHEADS

Cathodic Protection Current for Cr, Crni Steels, 10-24

### PHASE EFFECTS

Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62  
Duplex Stainless Alloy in Marine Environments, 10-63  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67  
Industrial Boiler Water-Related Failures, 6-51  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Pipe Coating's Influence on Cathodic Protection, 12-13

### PHASE, METAL STRUCTURE

Sour Gas Gathering System Failure Analysis, 4-10

### PHOSPHATE CONVERSION COATINGS

Stability on Auto Body Steels, 11-56

### PHOSPHATE INHIBITORS

Flue Gas Desulfurizer Inhibitors, 2-12  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Wet Abrasive Blasting Techniques, 10-31

### PHOSPHONATE INHIBITORS

Underdeposit Corrosion Due to Inhibitor, 2-31

### PHOSPHORIC ACIDS, CAUSES

Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

### PHOTOGRAPHIC TESTING

Sulfate-Reducing Bacteria Presence Test, 8-71

### PIERS

Power Line Pole and Tower Foundation Cathodic Protection, 8-20

### PIGGING, CLEANING

Desiccated Air Drying of Gas Pipelines, 4-48

### PILING

Electrically Conductive Portland Concrete, 3-19

### PINHOLES, COATINGS FAILURE

RP0188-88—Holiday Tests on Protective Coatings

### PIPE-TO-SOIL OR WATER TESTS

Lateral Potential Test Methods for Pipelines, 5-49  
Variations in Cathodic Protection Criteria, 8-17

# PIPELINES

Cathodic Disbonding of Tape Pipe Coatings, 11-19  
Effective Corrosion Monitoring Surveys, 4-41  
Erratum—Compensating for IR Drop on Pipe, 3-54  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Inhibiting Wet CO<sub>2</sub> Attack on Carbon Steel Pipes, 4-17  
Lateral Potential Test Methods for Pipelines, 5-49  
Pipe Coating's Influence on Cathodic Protection, 12-13  
Sour Gas Gathering System Failure Analysis, 4-10  
Sulfate-Reducing Bacteria Presence Test, 8-71  
Underground Pipeline Corrosion Control, 4-9

# FITTING

Age-Hardenable, High-Strength, High-Base Alloys, 9-59  
Austenitic Stainless Steel Welds vs Microbiological Attack, 8-62

Cathodic Protection Power Plant Steel Grounding Systems, 7-11

Control of Internal Attack by Bacteria, 4-49  
Deaerator Cracking Failure Analysis Review, 10-73  
Duplex Stainless Alloy in Marine Environments, 10-63  
Evaluation of Stainless Atmospheric Attack, 2-47  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67

Improved High Nickel Alloy Cast Material, 12-45  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Inhibition of Nuclear Waste Solutions, 5-34  
Integrity Assurance for Underground Tanks, 4-27

Crude Oil Still Overhead Attack by Oxidized Sulfur, 1-44  
Fluoroelastomer Expansion Joints vs H<sub>2</sub>SO<sub>4</sub>, 3-12  
Hastelloy C-22, G-30 Performance in Chemical Environments, 6-67  
Improved High Nickel Alloy Cast Material, 12-45  
Monel Failure in Hydrogen Fluoride Due to Hot H<sub>2</sub>SO<sub>4</sub>, 10-72

Tank Bottom Internal Repairs with FRP Linings, 8-32

Zirconium Pyrophoric Incident Avoidance, 10-70

# SURFACE PREPARATION

Aluminum's Resistance to Coal in Rail Cars, 11-37  
Coatings for Portable Water Tanks, 9-37  
Coatings Selection and Cost Guide—1988, 6-29  
Designing Coating Systems for Concrete, 9-34  
GRP Linings Compared to Rubber Linings, 12-19  
Impressed Current Cathodic Protection on Arctic Caisson, 11-25  
Inhibition of Wet and Raw Gas Pipeline, 12-29  
Pipe Surface Condition Influence on Stress Corrosion Cracking, 4-22

Polyester Tape for Atmosphere and Underground, 8-30  
Pressure Vessel Stress Cracking Test, 2-38

Recyclable Steel Grit for Surface Preparation, 10-35

Reinforced Polymer Joining by Laser Ablation, 12-52

RP0386-86—Railroad Hopper Car Internal Coatings, 11-40

RP0775-87—Corrosion Coupons in Oil Production, 4-57

RP0467-87—Interim Petroleum-Based Coating

Tank Bottom Internal Repairs with FRP Linings, 8-32

Tank Trunk Lined vs Acidic Pesticide Solution, 11-53

Water Tank Internal Recoating Case History, 10-47

Wet Abrasive Blasting Techniques, 10-31

# SWELLING

GRP Linings Compared to Rubber Linings, 12-19

# TABULATED DATA

Control of Fire Damage to Equipment, 12-59  
Monoethanolamine SCC Env Contents Influence, 12-53

# TAMCS, ELEVATED

Joint Failure in Elevated Concrete Tanks, 12-27

# TANK TRUCKS

GRP Linings Compared to Rubber Linings, 12-19  
Lined vs Acidic Pesticide Solution, 11-53

# TANKS, METAL

Ceramic-Coated Anodes for Cathodic Protection, 10-19  
Compliance Goals of Underground Tank Regulations, 11-31  
External Tank Bottom Cathodic Protection, 4-32  
Hope Cracking in HF by Residual Stresses, 12-49  
Inspection, Repair of Immersed Linings, 6-44  
Integrity Assurance for Underground Tanks, 4-27  
Liquefied Petroleum Gas Storage Vessel Cracking, 10-79  
NACE Standards, Certification in Tank Regulations, 11-30

Ship Ballast Tank Coatings, Cathodic Protection Tests, 7-24

Tank Bottom Internal Repairs with FRP Linings, 8-32

Underground Tank Protection and Regulations, 4-36

Vinyl Coating Failure from Inadequate Ventilation, 11-51

Washed Sludge Attack on Radioactive Tank, 5-16

Water Tank Internal Recoating Case History, 10-47

# TANKS, NONMETAL

Compliance Goals of Underground Tank Regulations, 11-31  
GRP Linings Compared to Rubber Linings, 12-19

Hope Cracking in HF by Residual Stresses, 12-49

Joint Failure in Elevated Concrete Tanks, 12-27

NACE Standards, Certification in Tank Regulations, 11-30

Techniques to Extend Lives of Nonmetals, 12-23

Underground Tank Protection and Regulations, 4-36

# TAPES, MULTIPHASE COATINGS

Cathodic Disbonding of Tape Pipe Coatings, 11-19  
Polyester Tape for Atmosphere and Underground, 8-30

# TEMPERATURE EFFECTS

Age-Hardenable, High-Strength, High-Base Alloys, 9-59  
Al-Zn-In-Si Anodes vs Hostile Marine Environments, 7-70  
Alloy Performance in Sulfuric Acid, 3-40  
Coatings Selection and Cost Guide—1988, 6-29  
Control of Fire Damage to Equipment, 12-59  
Corrosion Products Pressure Tests, 9-74  
Deaerator Cracking Failure Analysis Review, 10-73  
Integrity Assurance for Underground Tanks, 4-27  
Monoethanolamine SCC Env Contents Influence, 12-53  
Phosphate Stability on Auto Body Steels, 11-56  
Sulfobacteria vs Cuniwelded Pipe in Seawater, 8-57

# TEMPORARY COATINGS

RP0487-87—Interim Petroleum-Based Coating

# TENSILE TESTS

Fiberglass Oilfield Pipe vs Carbon Dioxide, 8-51  
Oilfield Elastomers, Seals vs DMDS, 8-46

# TENSILE STRESSES, CAUSES

Age-Hardenable, High-Strength, High-Base Alloys, 9-59  
Monoethanolamine SCC Env Contents Influence, 12-53  
Stainless Liquid Cargo Tank Truck Corrosion, 11-69

# TEST RACKS, COUPON FIELD

Atmospheric Corrosion Test Review, 10-56, 12-35

# TESTING

Air Pollutants vs Galvanized Steel, 3-47

Alloy Performance in Sulfuric Acid, 3-40  
Atmospheric Corrosion Test Review, 10-56, 11-64, 12-35  
Cathodic Disbonding of Tape Pipe Coatings, 11-19  
Compliance Goals of Underground Tank Regulations, 11-31
